God Disproved

This is a proof that God does not exist. It is done in Predicate Calculus. It is based on the problem of Evil.

Axiom 1 *All is created by God.*
Coloss. 1:16, Revelation 4:11, Jeremiah 10:16, Psalms 86:9

$$\forall x[\Omega_{God}(x)]$$

Axiom 2 *All by God is good.*
1.Timothy 4:4, Genesis 1:31

$$\Omega_{God}(x) \rightarrow \Theta_{good}(x)$$

Axiom 3 *There is evil.*
Mathew 6:13, John 5:19

$$\exists x[\neg\Theta_{good}(x)]$$

Theorem 1 *God does not exist.*
Proof 1

$$\forall x[\Omega_{God}(x)] \wedge [\Omega_{God}(x) \rightarrow \Theta_{good}(x)] \; Axioms 1\&2$$

$$\Downarrow Substitution$$

$$\forall x[\Theta_{good}(x)]$$

$$\Updownarrow DeMorgan$$

$$\neg\exists x[\neg\Theta_{good}(x)]$$

Which is a Contradiction of Axiom3.
